EDUCATION

Masters of Science in Data Science

Rochester Institute of Technology (GPA: 4.0/4.0)

Expected: December 2026

Rochester, New York

Relevant Coursework: Applied Statistics(A), Database Management(A), Visual Analytics(A), Software Construction(A)

Bachelor of Technology in Artificial Intelligence

Mahindra University (GPA: 3.56/4.0)

July 2020 - May 2024

Hyderabad, India

Relevant Coursework: Machine Learning(A-), Data Structures & Algorithms(A), Generative Artificial Intelligence(A-), Operating Systems(A-)

SKILLS

- **Programming Languages:** Python, Java, R, SQL
- **Cloud Platforms:** AWS, Azure, Snowflake, Databricks, Kafka, Microsoft Fabric
- **Data Engineering:** ETL, CDC, Data Pipelines, Apache Airflow, PySpark, SQL/NoSQL Databases
- **BI & Analytics:** Tableau, Power BI, Looker, Google Analytics, Streamlit
- **ML & AI:** TensorFlow, PyTorch, Scikit-Learn, BERT, LLMs, RAG, HuggingFace, CLIP, FAISS, YOLOv8, MediaPipe, OpenCV
- **Tools & Technologies:** Git, KQL, Docker, Jupyter

WORK EXPERIENCE

Digital Engineering Intern

Johnson Controls

June 2026 - Present

Sunnyvale, California

- Implemented **ETL pipeline** from **Microsoft Fabric** to **Snowflake** centralizing **17M+ chiller sensor records**, then **analyzed data to identify reliability trends and equipment failure patterns** by defining 15+ KPIs for equipment health monitoring.
- Built **Tableau dashboards** for cross-functional teams enabling optimized performance monitoring and reduced downtime.

Data Science Researcher

iCitizen

May 2025 - April 2026

Rochester, New York

- **Web scraped** and **analyzed 500K+ unstructured congressional profiles** from Congress.gov and Bioguide websites using APIs, **transforming unstructured data into structured datasets** stored in **AWS DynamoDB** for **real-time updates**.
- Designed a dynamic U.S. map using **D3.js**, visualizing senators, their sponsored bills and co-sponsors by state.
- **Increased user engagement by 27.2%** on the iCitizen app by building a **RAG-based LLM chatbot** leveraging semantic search and generative AI to provide personalized legislative information and political updates.

Graduate Teaching Assistant

Rochester Institute of Technology

May 2025 - May 2026

Rochester, New York

- Guided 200 undergraduates in **database systems** and **SQL** through labs focused on **query writing** and **relational data modeling**.

Data Analyst

StandardWings Technologies Pvt. Ltd.

August 2023 - August 2024

Nashik, India

- Extracted, cleaned and integrated **multi-source data** (GPS, sensor, Salesforce CRM, SAP, Excel) from 120+ vehicles into **AWS S3** using **SQL** and **Python**, enabling **Power BI** fleet analysis that identified **37% fuel cost reduction opportunities**.
- Collaborated with **cross-functional teams** throughout the project lifecycle to define **21 key KPIs** aligned with business objectives.

Machine Learning Intern

Cloud4C

June 2023 - July 2023

Hyderabad, India

- Achieved **over 90% accuracy** in a **sentiment analysis model** using **BERT** to analyze customer feedback.
- **Performed large-scale text analysis** on customer feedback using **Databricks** with **PySpark** for data processing.
- Identified **top 5 recurring customer concerns** using **unsupervised learning (K-Means clustering)** on BERT embeddings.

PROJECTS

e-CommMart: e-Commerce Data Platform | AWS, MariaDB, MongoDB, Python, ETL, CDC, NoSQL, Vector Search

[GitHub](#)

- Engineered a hybrid data platform using **Python/SQL ETL**, **MariaDB**, and **MongoDB** on **AWS EC2**, implementing **CDC-based synchronization** between relational and document stores for downstream analytics.
- Deployed a highly available **3-node MariaDB Galera Cluster** with replication, fault tolerance, RBAC, data-quality logging, and secure access controls

RIT Institutional Analytics | Tableau, Data Visualization, Relational Database

[GitHub](#)

- Developed 6 Tableau dashboards querying relational databases to analyze institutional data across enrollment, admissions, graduation, and faculty metrics; Won **2nd Place** at DataFest 2026.

Workout-Wise: Virtual gym trainer | Computer Vision, React, Tailwind, Flask, Vercel

[GitHub](#)

- Spearheaded real-time pose landmark detection using pre-trained models for immediate exercise feedback and form correction.
- Engineered a robust full-stack application to analyze sample exercise videos and generate personalized rules to train new users, Spearheaded real-time pose landmark detection using pre-trained models for immediate exercise feedback and form correction.
